

I am requesting that you reject NAB's petition 14-160. I am a big fan of XM satellite radio. They offer a variety of programs and top quality sound that you cant hear anywhere else. Furthermore my husband dedicates songs to me and they always get on the air--unlike local radio. What is happening to america??? My cable company dictates what I should watch and now someone wants to tell me what I should hear or not hear on satellite radio. I will address this issue to my local congressman and state senator.

Thank You  
Belinda Parker
